## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Cahajla US5699754.

Regarding claim 1, Cahajla discloses a substantially rigid frame 36 and a moisture resistant plastic stranded material (col 3, lines 60-63) woven into the frame to present the appearance of a rattan material.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-17, 23, and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cahajla in view of Liu US6230915.

Regarding claims 2, 16, 17, 23, and 24, Cahajla discloses a plastic material.

Cahajla does not disclose the structure is generally flat.

Liu discloses a structure comprising generally flat panels assemble together (Figure 2).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of Liu to the invention of Cahajla in order to make a more versatile product which was easier to package and assemble.

Regarding claim 3, Cahajla discloses a box like structure (Figure 2).

Regarding claim 4, Cahajla discloses the bottom of the structure is open (col 3, lines 20-25).

Regarding claims 5 and 6, Cahajla does not disclose a pin and ferrule coupling.

Liu discloses a pin 31', 32', 33' and ferrule (unnumbered) coupling attached to each other by at least one connector foot comprising a resilient block 42, 43 for engaging cooperating posts of the panels.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of Liu to the invention of Cahajla in order to make the structure more sturdy and easier to assemble and disassemble.

Regarding claim 7, Cahajla discloses a catch tray 18 for resting a litter box thereon.

Regarding claim 8, Cahajla discloses a removable catch tray 14a, 14b has at least one notched corner (see element 14a in Figure 2).

Regarding claims 9, 12, 13, and 15, Cahajla does not disclose a pivotally opening front panel.

Liu discloses a pivotally opening front panel 9.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of Liu to the invention of Cahajla in order to control ingress and egress.

Regarding claim 10, Cahajla discloses at least one rail 32 for sliding a litter pan thereon.

Regarding claims 11 and 14, Cahajla discloses a latch 40, 42 in the form of threads.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kenney USD426684; Markey US5551371; Wade et al. US6062169; Rawson US6286458; Crafton et al. US6298808; Gramlich US6332429; Tomlinson US6367420; Sexton US6848394.
